

## Additional Cost Recovery

Within its Tariff, TransGas may require the recovery of additional costs incurred for services rendered. This is required for services that initiate at the Nova Inventory Transfer (NIT) point. In addition to the standard R11.0, R19.0 and R90.0 receipt tolls, charges for additional cost recovery on services that initiate at NIT will be as follows:

**Effective Date: May 1, 2011**

| Service Type                | Term          | Demand Charge<br>(per GJ/d per<br>month) | Commodity Charge<br>(per GJ) |
|-----------------------------|---------------|--|------------------------------|
| Long Term Firm              | 1 to 2 years  | \$ 4.3700                                | -                            |
|                             | 3 to 4 years  | \$ 4.1500                                | -                            |
|                             | 5 + years     | \$ 3.9400                                | -                            |
| Short Term Firm             | Not Available | -  | -                            |
| Interruptible               | -             | -  | \$ 0.1581                    |
| High Priority Interruptible | -             | -  | \$ 0.1581                    |
