

## Alternatives for viewing report lists in QPTM Web sessions:

Customers have asked if there is the ability view the report lists in a manner that will display the report name in full.

There are two options for the user to choose –

- Grid View – the default
  - Information about the report is provided
  - The full name of the report may not be shown
- List View – user must change to this view manually
  - Will default back to Grid View once the user leaves the page
  - It is not yet possible to save this as the Default view.
  - Information about the report is not provided

Change the View by clicking in 'bars' the top left corner within the green band

### GRID View

This is the default view: 'Grid View'

Click on the button with 3 bars this will change the view to 'List View'

AGGREGATE LOCATION DAILY (RPT\_ALR...)

Displays The Individual Daily Detail Measured And Energy Quantities For Child Locations Behind An Aggregate Location For A Given Month.

AGGREGATE LOCATION DAILY (EXPORT)...
