

How to have multiple TransGasNext QPTM Web sessions:

Customers have asked if there is the ability to have multiple QPTM Web application screens running at the same time.

To accomplish this it is necessary to have multiple internet explorer (IE) sessions running at the same time.

Start IE and log into the MyTransGas – QPTM web application as usual.

To start another instance of QPTM Web:

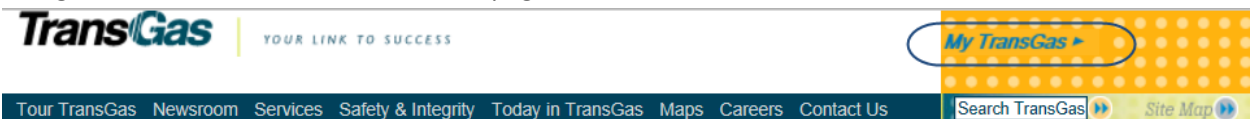

- Right click the IE icon in the start menu bar:

- Select Internet Explorer

- This will open a new internet explorer session.
- Navigate to the TransGas web site home page.

- Select 'MyTransGas'. Since you are already logged into a different session, you may not be required to login again and are presented with the QPTM Web home page. Otherwise enter your login credentials.

- To switch between QPTM Web sessions, use the IE icon in the start menu bar. Hover (do not click) over the IE icon to see a list of IE sessions to choose. Click the session to navigate to.
