

TransGas

2018 January 8,

Proposed Rate Adjustment April 1, 2018

TransGas Limited (TransGas) is proposing changes to its rates for transportation and storage services effective April 01, 2018. This proposed rate adjustment will increase all Transportation and Storage rates by 5.9 percent. TransGas will be proceeding through the Governance process and the proposed increase is expected to be finalized in late March 2018.

The requirement for the rate increase is primarily due to increased costs incurred by TransGas to continue providing high quality, safe and reliable service to its customers including an increased focus on system integrity and facility infrastructure. TransGas has had no rate increase in over 2 years with the last TransGas rate change on January 1, 2016. Specific transportation and storage rates will be communicated once the rates have been formally approved.

If you have any questions regarding how the rate adjustment will affect you, please contact your Key Account Manager, Nicole Sali at (306) 777-9501 or Wendy Uytterhagen at (306)777-9687. If you have more general questions regarding these changes, please contact myself at (306) 777-9136.

Yours truly,

TRANSGAS LIMITED

Kim Korchinski
