**TO: Customers Offered Interruptible Export**

**July 16, 2019**

### **Daily Export Service Offerings**

On June 26<sup>th</sup> a communication was released regarding 2019/2020 export service offerings. TransGas wanted to take the opportunity to clarify the process surrounding the allocation of interruptible (IT) daily export service (E19.0 contracts)

### **Daily Interruptible Export Service**

The available daily IT export is currently offered to customers through a daily email process, in which customers have an opportunity to respond to an email issued by TransGas for future gas day export activity. The daily emails when IT export is available are issued in the afternoon for future days and only to customers who have requested to be included on the distribution list. The following day, customers have until 7:15 am to respond with the quantities they wish to secure for the following gas day. TransGas will respond to all quantity requests by 7:30 am indicating the allocated volumes.

The rules surrounding the morning allocations are as follows:

- 1) Once volumes have been allocated, they are considered to be “take or pay”. If a customer no longer wants the export allocated, they will still be charged for transport requested.
- 2) No bids or revisions will be accepted after 7:15 am.
- 3) The only exception to this is if the IT export is not fully subscribed and/or the allocations did not result in any customer receiving a prorated amount of their requested IT export. In this situation TransGas will rescind any unwanted amount free of charge.

Based on current information, it is estimated that daily IT export will range from 0-80 TJ/d, with greater levels available in the summer season when Saskatchewan delivery demand is at a lower level than in the winter season. Export locations could be at Empress or any of the SSDA export points.

If you have any questions regarding the information shared in this announcement, please contact a member of the TransGas Customer Services team.
